PROJECTS

International Space Station Locator

This project aims to provide users with real-time coordinates of the International Space Station (ISS) through a web interface. By leveraging the ISS API, the website fetches the current location data and displays it to users.

Joke Junction

The Joke Junction web app is a simple application built using Node.js, EJS, Axios, Express, and Body-parser. It generates jokes based on different categories selected by users.

Book Review

This is a Book Review Website developed using Node.js, Express, EJS, Axios, PostgreSQL, and various other technologies. It allows users to read book reviews, view post statistics, like specific reviews, and submit their own reviews, which will be sent for approval to the admin. The admin has privileges to log in, manage reviews by adding, deleting, or updating them.

Airbnb Clone

This is the clone of the homepage of the airbnb website only frontend and responsive.
